

PUBLISHING DATA, MEDIAPIPE, AI GOOD PRACTICE

Service and Support from Project S

Job Schepens

Universität zu Köln

8 July 2026

OVERVIEW

Three parts:

- **Part 1 — Publishing Data** licensing, FAIR principles, data journals, and choosing a repository (Zenodo, OSF, LAC, etc.)
- **Part 2 — MediaPipe Group** quick recap of what the group is, and a call for contributions
- **Part 3 — AI Good Practice in Daily Workflows** workshop at the upcoming CRC 1252 retreat (5–7 October 2026)

PART 1: PUBLISHING DATA

PART 1 · PUBLISHING RESEARCH DATA

PART 1: PUBLISHING DATA

PROJECT S

We help with, e.g.:

- **Choosing a repository:** Zenodo, OSF, LAC, etc.
- **Choosing a License:** choosing a licence, identifying responsible parties (you, PI, UzK)?
- **Sensitive data:** determining access, secure storage, encryption, GDPR
- **Data Management Plan:** drafting, reviewing
- **Data paper:** finding a suitable journal (e.g., JOHD), documentation

PART 1: PUBLISHING DATA

GOOD SCIENTIFIC PRACTICE

As open as possible:

- **Open Science** Make data usable for reuse and replication
- **All Rights Reserved** : Without a license, nobody may legally copy, reuse, or redistribute your data, even if it is in a public GitHub repo

As closed as necessary:

- **Ethics** GDPR, informed consent, and sensitive data

Who Decides?

- The person accountable / grant holder / the PI / the PI's

PART 1: PUBLISHING DATA

REMOVING UNNECESSARY BARRIERS

FAIR principles:

- **F — Findable:** metadata, DOI
- **A — Accessible:** clear access conditions
- **I — Interoperable:** standard format
- **R — Re-useable:** what may others do? + provide documentation
- Also sensitive data can be FAIR

PART 1: PUBLISHING DATA

DATA LICENSES

Creative Commons is the most common licensing framework for research data. It has a modular structure, e.g.:

- **CC0 (Public Domain)**: “Waiver”, waives all copyright and database rights.
- **BY** (Attribution): Users must give you credit.
- **SA** (ShareAlike): Adaptations must be licensed under the same terms.
- **NC** (Non-Commercial): Only non-commercial use is permitted (not recommended).

CC BY (Attribution)
CC BY-SA (Attribution-ShareAlike)
CC BY-NC (Attribution-NonCommercial)
CC BY-NC-SA (Attribution-NonCommercial-ShareAlike)

Licenses for software (e.g., MIT/GPL) don't address database rights, personal-data protection, or citation norms that apply to research data. *We will discuss licences in detail in the next RDM session (July 15th)*

PART 1: PUBLISHING DATA

DOCUMENTATION: DATA JOURNALS

A **data paper** in a peer-reviewed data journal can help to properly document a dataset. Examples:

- **Journal of Open Humanities Data** Ubiquity Press / Brill
- **Journal of Open Psychology Data** Ubiquity Press / Brill
- **Research Data Journal for the Humanities and Social Sciences** Brill
- **Scientific Data** Springer Nature
- **Data in Brief** Elsevier

PART 1: PUBLISHING DATA

STORING AND PUBLISHING SENSITIVE DATA

GDPR: Extra care in anonymization/pseudonymization, informed consent, and storage:

- **Sciebo** (or similar) is not built for sensitive data
- Consider purpose-build access-controlled repositories (e.g., CLARIN/Language Archive Cologne, Dataverse/TROLLing, etc.).
- Institutional network drives with an access log
- **Encryption**

PART 1: PUBLISHING DATA

CHOOSING A REPOSITORY

Important criteria include **Visibility (in community)** and **Openness of the License** e.g. OSF does not require an explicit license.

- **Open Science Framework (OSF)** helpful concepts for **experimental data** (e.g., structured project components, preregistration). Supports **granular licensing** (e.g., project page CC BY, data component CC0). Full project lifecycle.
- **Zenodo** — general purpose; funded by the EU, operated by **CERN**.
- lac.uni-koeln.de — good for **audio-visual data**, including annotations alongside recordings; operated by the **Data Center for the Humanities (DCH)**
- site.uit.no/trolling — built on the **Dataverse** platform, recommended by journals (e.g., *Glossa*)

PART 1: PUBLISHING DATA

CHECKLIST

- Ask Project S
- Don't leave a dataset unlicensed
- As open as possible, as closed as necessary
- Check GDPR/consent
- Use secure storage when necessary
- Choose a suitable repository
- Consider a *data paper*

PART 1: PUBLISHING DATA

PART 2: MEDIAPIPE

PART 2: MEDIAPIPE

PART 2: MEDIAPIPE

MEDIAPIPE SPECIAL INTEREST GROUP

What?

- Ongoing, informal, discussion and exchange group
- Focus on video-based motion tracking of gesture, sign, gaze, etc. using tools such as **MediaPipe**, **OpenPose**, **OpenFace**
- Original idea is to support projects studying e.g. multimodal prosody and signal, code, and interactional prominence

How?

- 5 meetings in the past 12 months based on interest and available speakers.
- Vadim Kimmelman (March 2026), Anna Kuder et al. (Nov 2025), Fabian Eckert & Aviad Albert et al. (Sept 2025), Klym Myslyvyi & Janne Lorenzen et al. (July 2025), and an open discussion after PaPe/EnvisionBox (July 2025).

PART 2: MEDIAPIPE

CALL FOR CONTRIBUTIONS

- **Propose a talk:** work-in-progress, a problem you're stuck on, etc.
- **Suggest a speaker:** know someone (internal or external) working on multimodal prosody, gesture, or gaze methods?
- **Suggest a topic / question:** work on problems together
- **Join the mailing list.**

PART 2: MEDIAPIPE

PART 3: AI

PART 3: AI

PART 3: AI

AI GOOD PRACTICE NORMS

- Currently: ad hoc individual practices, for example, is it OK to use AI to summarize papers you haven't read?
- **What:** responsible use of LLMs, disclosure and documentation norms, data privacy, AI openness questions.
- **Starting point:** UzK **KI-Richtlinie** (27 January 2026)
- **When:** the CRC 1252 retreat, **5–7 October 2026**.

PART 3: AI

THANKS FOR YOUR ATTENTION!
